

AGM Annual Report from the Inventory Committee

March 20th 2022

We want to thank the fellowship for their many wonderful suggestions and thoughtful concerns.

The committee has completed the first phase, which was to create and distribute an inventory/survey to the general membership. The opportunity to fill out the survey was available for approx one year till Feb 2021.

Afterward there were 3 reports generated and posted to the website. The Full Results of Inventory (82 pages) The Written Responses condensed (30 pages) The Summary of Inventory (16 pages) of all of the members to read. It was recommended that each committee and board member look at the results and apply the suggestions and weigh the concerns, where possible.

It was noted that many suggestions were already being implemented and continue to be. A few examples: changes made to the website for easier access. The PI and SSC has been active in improving our communication and visibility within the fellowship and at the public level.

Unfortunately the second aim of the committee (to conduct a survey for the board) has been postponed due to the lack of members interested and available to implement the second phase. Our chair resigned which left only one ABA member and a board member. It was decided that to ensure a quality product we needed more members to step up to support this process. A request was made and we have not yet received any new members.

The results are still posted on the website for anyone interested.

Committee member co chairs: Tammie and Judy
